## FASSA BORTOLO INTERNATIONAL AWARD FOR SUSTAINABLE ARCHITECTURE Built Projects - 14<sup>th</sup> Edition 2021

This year the International Award for Sustainable Architecture has reached its fourteenth edition and has established a new record of participation, as many as 192 projects from over 40 countries took part in the initiative. The event conceived and promoted in 2003 by the Department of Architecture of the University of Ferrara and by the Fassa company on the occasion of the tenth anniversary of its foundation, was born from the desire to reward and make known to a wide public architectures that know how to relate in a balanced way with the environment, which are designed for human needs and are capable of satisfying the needs of our generations without limiting those of future generations through the indiscriminate consumption of resources and the pollution produced.

The initiative alternates annually with a section reserved for thesis, master and doctoral theses, while another dedicated (like this year) to projects realized by professionals. The panorama of the projects that took part in the selections has extended to five continents, hosting contributions from Italy as well as from various European and non-European countries, among the most distant Antarctic, Australia, Burkina Faso, Indonesia, India, United States and South Africa.

The commission, chaired by professor Thomas Herzog (Thomas Herzog Architekten, Munich - Germany) was also composed by Marianne Burkhalter (Atelier Burkhalter Sumi - Zurich), by Sami Rintala (Rintala Eggertsson Architects - Oslo) and by the professor of the Department of Architecture of University of Ferrara Nicola Marzot.

The jury decided to award with the gold medal the project of *Tofu Factory* design by the chinese studio DnA\_Design and Architecture (Xu TianTian) built in the village of Caizhai, Dadongba Town, Songyang County, Lishui, Zhejiang Province in China.

The two silver medals foreseen by the call went to Grafton Architects (Yvonne Farrell and Shelley McNamara) of Dublin with *Kingston University Town House* building in London and to *Girl Move Academy* project in Nampula, Mozambique by ROOTSTUDIO + Paz Braga (Joao Caeiro, Paz Braga) of Oaxaca, Mexico.

In addition, 12 other projects from Austria, Germany, Italy, Indonesia, Mexico, Spain, Switzerland and Vietnam were selected as honorable mention.

The Fassa Bortolo Special Prize, an award that will be recognize exclusively those who, in compliance with the principles of sustainability and architectural quality, have been able to use the solutions belonging to the Fassa Bortolo Integrated System. In this fourteenth edition, the jury identified two ex aequo winners; the milanese studio of architect Stefano Guzzini with the *Villa Molli* project and the *VILLA CORNER SMANIA – restoration and functional recovery of the barchessa for the new hotel destination* by the architect Stefano Sartori's studio of Padua.

Below is the list of projects highlighted by the jury and for more information on the event you can visit the website of the initiative [www.premioarchitettura.it](http://www.premioarchitettura.it).
